

RainSoft turns ordinary water into extraordinary water . . .

Ultrefiner[®] Reverse Osmosis Drinking Water System

RainSoft's most versatile drinking water system. Customized to deliver the best drinking and cooking water possible.

RainSoft R.O. =
The Ultimate Drinking
Water Solution.

Now you have an even greater choice when it comes to selecting the finest drinking water system available for your family.

RainSoft reverse osmosis drinking water systems combine high efficiency along with your choice of pre-filter, post-filter, and system capacity. Your RainSoft dealer can help you to choose the system that's best for your local water conditions.

2 Systems are available: UF22 and UF50

UF22 High production TFC R.O. element, high efficiency carbon block sediment pre-filter, carbon block sediment post-filter.

UF50 High production TFC R.O. element, high efficiency carbon block sediment pre-filter, superior carbon block sediment post-filter that reduces Volatile Organic Chemicals (VOC's).

RainSoft turns ordinary water into extraordinary water . . .

The smart, economical way to enjoy the best water possible.

How an Ultrefiner System Works

1. Water from the inlet valve enters the system.
2. Water is forced through the pre-filter cartridge that reduces particles, and polishes the water prior to entering the reverse osmosis membrane.
3. Water then enters the reverse osmosis cartridge where it is filtered through a spiral wound, semi-permeable membrane.
4. The resulting highly filtered water enters a storage tank.
5. Your reverse osmosis water is finally filtered through the system post-filter and dispensed through a dedicated drinking water faucet.

The Ultrefiner Delivers Superior Filtration

The Ultrefiner system uses reverse osmosis technology to filter extremely small particles, particles that can easily slip through a less sophisticated filter.

System Features

- Modular design makes changing the filters simple.
- No need to drain the storage tank when changing filters, thanks to the convenient shut-off valve.
- The dual positioning storage tank can be mounted either vertically or horizontally.
- The system incorporates a reversible, self-cleaning drain restrictor and easy fast-flush device.
- Choice of pre-filters and post-filters take care of almost any water concern.
- Produces very low sodium "ingredient quality" water for drinking and cooking.
- Installed with a RainSoft UltraTap Faucet, contamination due to possible back siphoning is eliminated.

Ultrefiner models UF22T-CB and UF22N-CB are certified by NSF and WQA to NSF/ANSI Standard 58. Ultrefiner models UF50N-CBVOC and UF50T-CBVOC are certified by NSF and WQA to NSF/ANSI Standard 58. Refer to the manufacturer's Performance Data Sheet for specific claims and certifications.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, AWTP, LLC. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. AWTP, LLC does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
